AMERILUBE DCWS

SYNTHETIC WATER SOLUBLE DRAWING FLUID

AMERILUBE DCWS Synthetic Water Soluble Drawing Compound is a premium drawing fluid intended to be used neat. It provides for smooth non-staining drawing of ferrous and non-ferrous metals. AMERILUBE DCWS can be removed from the drawn material by simply washing the part with water. This allows easy metal preparation for plating and other finishing.

- Excellent Coolant Properties
- Excellent Film Strength
- Reduced Lubricant Consumption
- Good Dispersant Properties
- Very Long Fluid Life
- Excellent Rust Control
- Reduced Maintenance Costs
- Excellent Miscibility in Water

Typical Properties

Lubricant Designation		DCWS
Density	D1298	.89
Viscosity, cSt @ 40 °C	D445	97
Viscosity Index	D2270	108
Pour Point °F	D97	-18
Flash Point °F	D92	489
Fire Point °F	D92	541
